

# Preliminary Information

## Ultra compact video quad display module With Ovation's *i-Conex* miniature Connector System

- micro-FourSight with Ovation's easy to use *i-Conex* interconnection system.
- Allows up to four cameras to be viewed on one screen.
- Small compact size, ideal for ultra-covert and mobile installations.
- DC powered with low current consumption (~140mA at 12V).
- 16 preset display modes which are fully configurable via a PC utility and USB/RS232 control interface.
- On-screen date, time and camera ident.
- Automatic configuration for PAL or NTSC video inputs.

micro-FourSight-C is new version of the micro-FourSight advanced video quad, fitted with Ovation's *i-Conex* miniature connection system.

The *i-Conex* connectors allows for easy installation with Ovation's FlashBack-2C and FlashBack-3C range of DVRs, along with the *i-Conex* bullet camera. For convenience, DC power is provided with each video input which can be used to supply cameras etc.

Unlike most quads, micro-FourSight-C is very compact, lightweight and power efficient. micro-FourSight's advanced digital video processing provides full control of each picture's size and position together with picture cropping and overlay. For ease of use the system includes 16 pre-set display modes, which can be reconfigured via its USB/RS232 control ports and optional PC configuration utility. micro-FourSight-C provides excellent picture quality coupled with real-time update rate per channel.

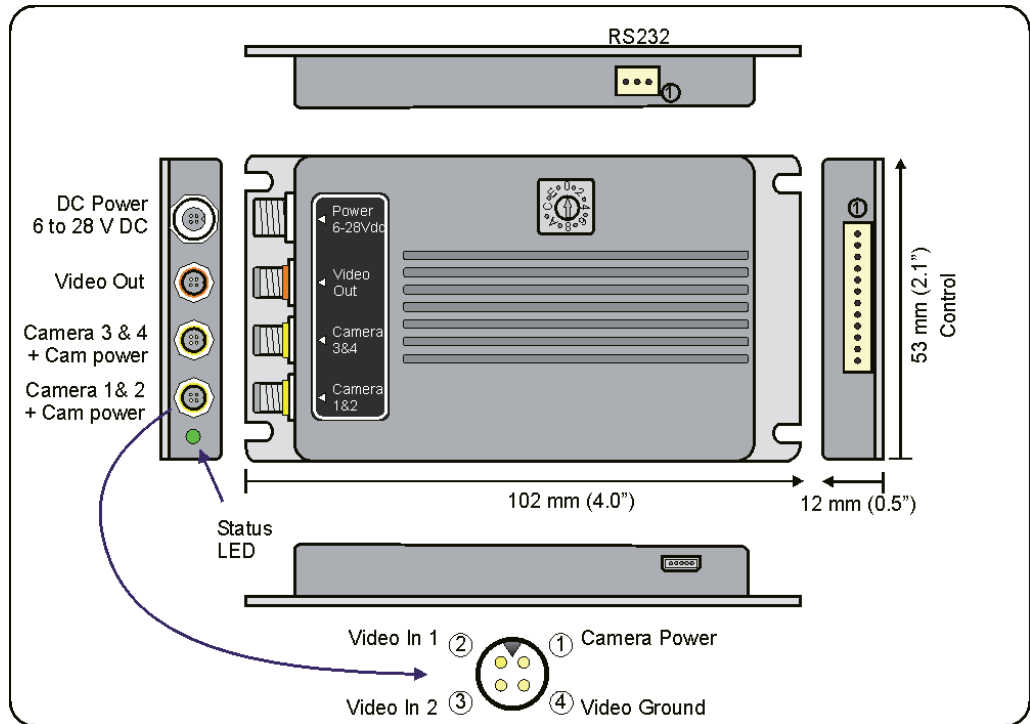

micro-FourSight-C is fitted with Ovation's *i-Conex* miniature inter-connection system for ease of wiring and installation.
