Crime-lite®AUTO

The complete forensic imaging solution.
Search, Detect, and Capture evidence.

foster+freeman

Crime-lite® AUTO

A single device to revolutionise your investigations

For forensic examiners seeking to streamline and modernise their investigations, the Crime-lite AUTO is compact and powerful full-spectral imaging device for the search, detection, and capture of evidence.

The complete all-in-one handheld device

Includes 20MP camera, LED illumination, and intelligent motorized filter selection.

Seamless examination of the crime scene

Explore the entire forensic spectrum to reveal more evidence, faster and more efficiently.

Never miss a Trace

Using pre-set examinations, verified by science, to maximise the detection of evidence.

Why the Professionals Choose Crime-lite AUTO

"This piece of equipment did more to improve this office's ALS capabilities than any other ALS equipment previously utilized by this office's personnel."

Forensic Specialist with the US Military

"In a modern, complex crime scene having access to the latest and best technology not only saves processing time but produces better results and increases the ability to bring offenders to justice."

Head of Forensic Services for a UK Police Force

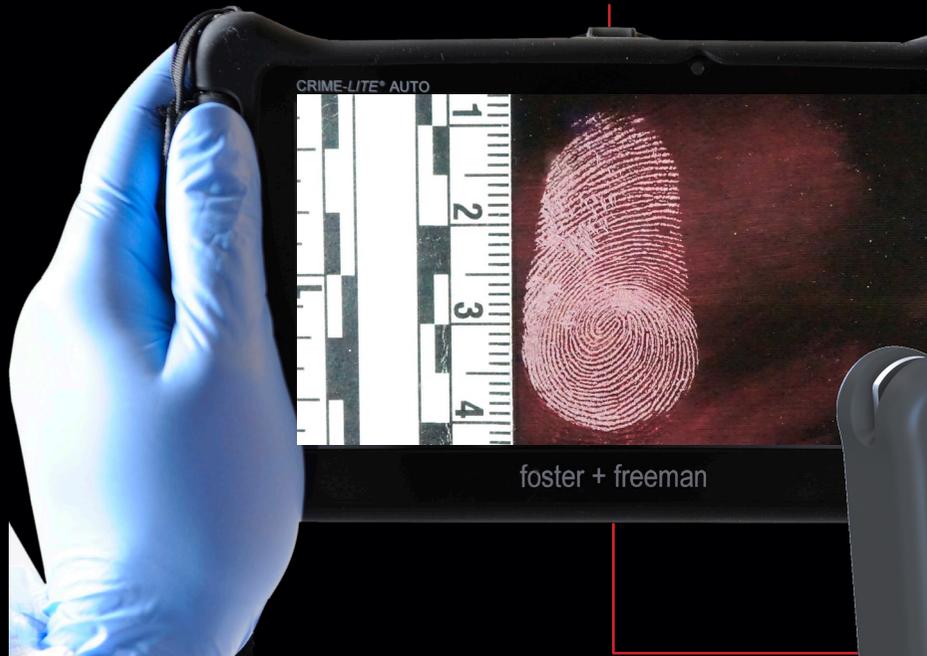

Expert Technology, Simply Operated.

Intelligent Software
operated via Intuitive Interface

Multi-spectral Illumination

Automated Filtration

UV-Vis-IR Camera

Streamline Examinations

using the complete all-in-one device for
the detection and imaging of evidence

✓ Camera ✓ Lights ✓ Filters ✓ Interface

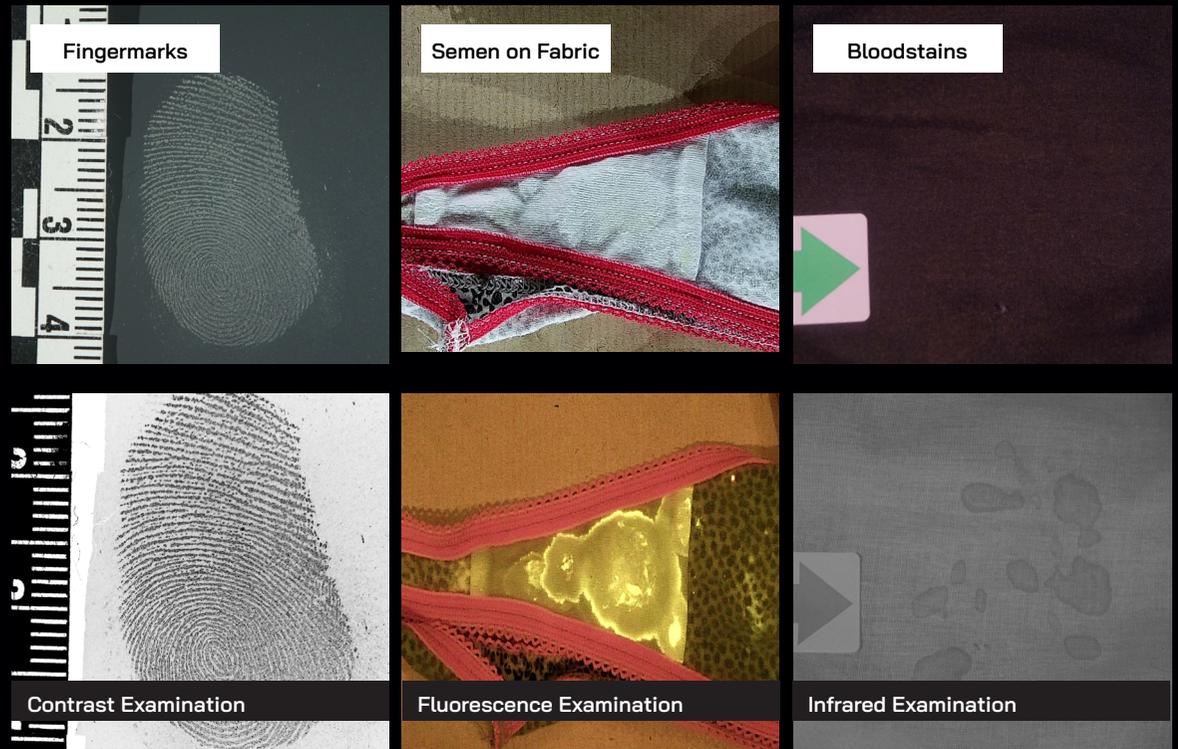

Interchangeable Battery

Replace multiple cases of equipment with a single handheld device

Crime-lite® AUTO

Detect More Evidence

Explore the entire forensic spectrum to reveal more evidence, more efficiently than ever before.

- Fingermarks
- Body Fluids / DNA
- Bloodstains
- Drugs / Narcotics
- Gunshot Residues (GSR)
- Hair & Fibres
- Suspect Fibres
- Latent Prints
- Glass Fragments
- Human & Animal Hair
- Accelerants
- Bruising
- Bite Marks
- Shoeprints
- Bone & Tooth
- Tire Tracks
- and more...

Never Miss a Trace

Maximise the detection of evidence using pre-set 'AUTO-mated' examinations.

AUTO-mated Examinations

Unique to foster+freeman, the Crime-lite AUTO enables examiners to search for evidence using a set of scientifically verified 'AUTOmated' examinations.

Simplified Operation

Automatic selection of light source and filter based on the evidence type being searched.

A Scientifically Verified Solution

Pre-set examination settings have been derived from a unique dataset developed as part of an exhaustive body fluid detection study.

Optimise Every Examination

Achieve the best possible results during every single examination.

Pre-set examinations are selected via a simple icon-driven interface

Capture. Examine. Share

Connect to the dedicated Crime-lite App to send images direct from the crime scene.

Connect Crime Scene to Incident Room

Providing immediate communication between the crime scene and investigators back at HQ, communication via the the Crime-lite App can increase the accuracy and efficiency of investigations.

Preserve Evidence

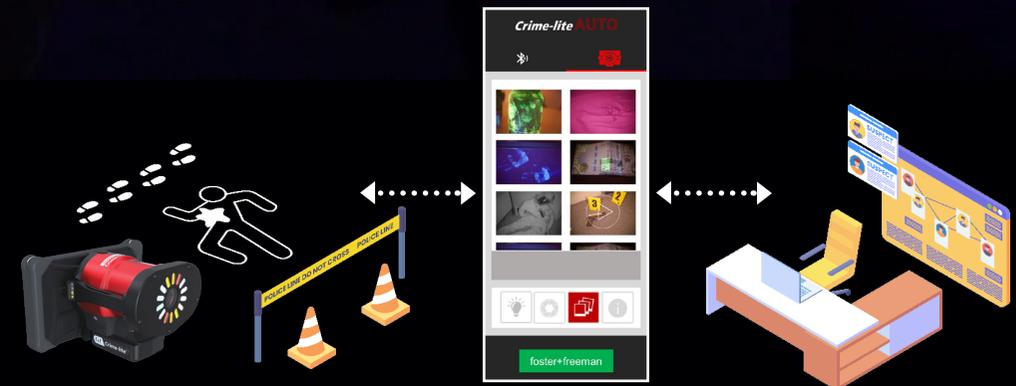

Using non-contact imaging to quickly document evidence before it is lost or altered.

Instant Communication & Collaboration

Between forensic specialists and investigators for remote analysis of evidence.

Increase the Speed & Efficiency of Results

By sharing images of the scene and evidence to enable investigators to make informed decisions about the direction of the investigation.

Compatible with Android and IOS devices

Share data and images for remote collaboration

A Complete Fingerprint Imaging Solution

Place the Crime-lite AUTO at the heart of laboratory fingerprint imaging system

DISCOVER for Crime-lite®AUTO

Unleash the full imaging capabilities of the Crime-lite AUTO as part of a powerful fingerprint laboratory workstation

Improve the Ease and Efficiency of fingerprint imaging in the laboratory by combining the powerful Crime-lite AUTO with DISCOVER, a dedicated docking system (complete with evidence specific imaging modules) to provide a complete fingerprint imaging solution.

Streamlined Fingerprint Photography

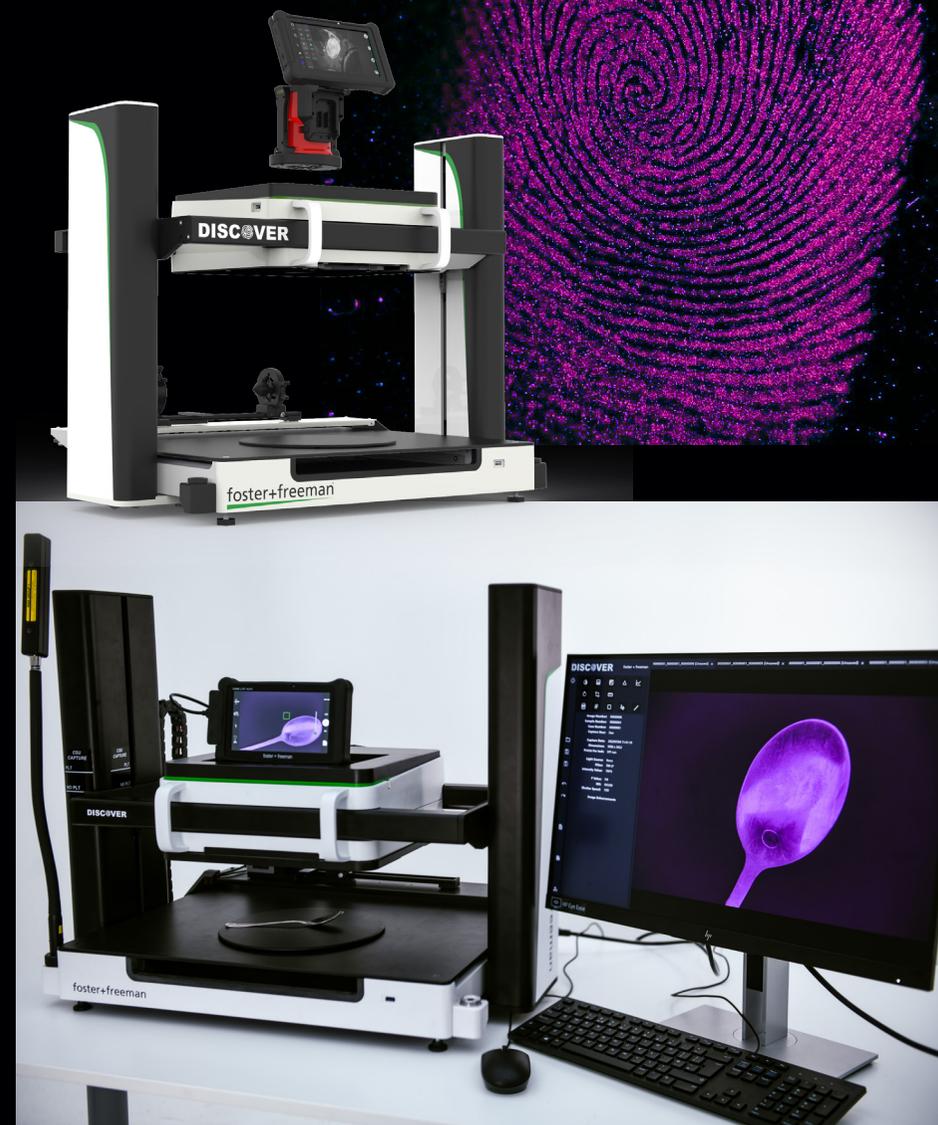

Applies the intuitive operation of the Crime-lite AUTO to laboratory fingerprint imaging.

Maximise Image Quality of Identifiable Marks

Using specialist post-capture print enhancement and processing technology.

The Complete Imaging Solution

Perform advanced evidence search, examination and imaging functions using a selection of illumination modules. Produce court-ready reports complete with evidence audit trails.
